

Type of work :					
General work:		Height work :		Hot work:	
Sunday / Holiday work:		Confined space work :		Electrical work:	
Unloading - flammable liquid/gas to storage tank:		Excavation & Digging work :		Lifting/Shifting heavy equipment/machinery/material	

Permit Initiator Name and Department :			
Permit issued to(Name of Contractor) :			
Location :		Permit number :	
Work description :		Number of persons involved:	
Date:		Start time:	
		End time :	

Supporting Documents			
LOTO number:		Is LOTO applied as per LOTO procedure, checked and registered in the LOTO register	
JSA number :		Are the JSA findings attached and relevant control measures added and communicated to the permit authoriser	
TBT number:		Is Tool Box Talk done before the start of the work and recorded	

List of PPEs Required for the Specific Work				
Metal Toe/ Fiber Toe(Electrical work)/ Gumboots / Leather(Hot work)/ Leg sleeves Shoe	electrical/ Leather(Hot work)/ Cotton / Nitrile/ Cut resistant gloves	Cover all/ Leather Apron(Hot work) / PVC Apron/ Reflective Jacket	Surgical/ FFP2 Half face respirator mask	PVC Face / Welding Shield Safety Goggles (Hot work)
Safety Helmets	Retractable / Rope grab fall arrester(Height Work)	Ear Plugs/ Ear Muffs	Full body harness/ Lifeline(Height work)	Safety nets(Height work)

Safety Checklist					
Common Checks to be done for all work and General Work			Yes	No	NA
1	Has the worker been trained for this task?				
2	Are all tools and equipment inspected for (ELCB, or industrial socket and double insulated tools) and safe to use as per equipment-specific checklist(e.g. tool inspection checklist)?				
3	Is Housekeeping done and are the pits/sumps/trenches nearby covered properly to avoid slip/trip/fall hazards??				
4	Are existing control measures as mentioned in JSA adequate to conducting work in a safe manner?				
5	Sufficient Lighting and ventilation provided?				
6	Is the necessary barricade and warning signage in place (e.g. Caution boards, Appropriate barrication tape)?				
7	Are emergency exits accessible? Are emergency protocols communicated to all?				
8	Is all PPEs used appropriate for the work as specified in the JSA / Permit to work and inspected?				

Hot work		Yes	No	NA
1	Are combustible or flammable materials identified and removed within a 10-meter radius?			
2	Is fire protection provided for combustible materials, flammables, and cylinders that cannot be removed?			
3	Are gas cylinders, hoses, and nozzles in good condition, equipped with safety measures including pressure gauges and flashback arrestors on both sides of the nozzle, and appropriately guarded where necessary?			
4	Is appropriate fire fighting equipment available(Fire Extinguishers/Fire Blankets/Fire Buckets/Fire Hydrants/Fire Alarms and Detectors/ Sprinkler Systems)?			
5	Are the smoke detectors protected to avoid False alarms?			
6	Is a dedicated fire watcher in place and trained?			
Height work		Yes	No	NA
1	Are all the members required to work at height medically fit, trained, assessed and certified?			
2	Is proper fixed support/structure available/lifeline provided for anchoring the safety belt and safety measures provided for work above 1.8 meters?			
3	Are tools/materials secured with a rope, carried in a Toolbag tied to a rope, or attached to the person with a tool belt?			

Electrical work		Yes	No	NA
1	Is the FRP ladder used wherever required? Is a proper working platform ensured (wherever required)?			
2	Is an HV and LV detector used to ensure a zero energy state?			
3	Has the consumer/company side HT AB switch been switched off, earthed, and Lockout/Tagout (LOTO) procedures applied before commencing work on subsequent HT side equipment?			
4	Have Lockout/Tagout (LOTO) procedures been implemented to ensure equipment and capacitors are free of residual energy, specifically using appropriate discharge rods or earthing trolleys?			
5	Are Rubber Mats provided as per IS 15652? Are they in good condition?			
Unloading tanker containing flammable liquid/gas to storage tank		Yes	No	NA
1	Are all valid and relevant documents like Driver and vehicle documents verified and checked?			
2	Is the Spark Arrestor fixed to the exhaust pipe of the tanker?			
3	Is earthing and bonding done to the tanker to avoid static energy discharge?			
4	Is Secondary Containment provided at the Tanker & pump connection point to collect leakages (if any) and thus avoid land contamination?			

4	Ensure scaffolding or aerial work platforms (boom/scissor lifts) are securely positioned, with stable bases, safe access, adequate platforms, proper guardrails, toe guards, functioning wheel locks (for mobile scaffolds), in good condition, and green tagged for safe use.			
5	Check if the ladder is in good condition, green tagged ("Safe for Use"), secured at the top, extends(Approx 1m), and ensures 3-point contact while climbing.			
6	Boom/scissor lift – Emergency control, load details & trained operator?			
Excavation work		Yes	No	NA
1	Are all valid and relevant documents like License, and Earthmover documents verified and checked?			
2	Is nearby Structures and buildings verified and considered safe to work			
3	Are relevant excavation protection methods used to avoid cave-ins and slide-overs to protect the employees and machinery?			
4	Is heavy vehicles and the excavation work done at a safe distance of 3m from the area to avoid collapse?			
5	Have underground utilities and electrical supplies been isolated and covered according to drawings, and have obstacles like overhead power lines been checked to ensure unrestricted vehicle access?			
6	Is a Signalman available and trained to provide a signal?			
Confined work		Yes	No	NA
1	Is the atmosphere in the confined space tested for hazardous or flammable gasses using a multi-gas analyser, ensuring that the Lower Explosive Limit (LEL) is within 0-10%?			
2	Is appropriate oxygen concentration available in the confined area (19.5 to 22.5%)			
3	Confined space purged with air using a blower for a minimum of 2 hours?			
4	Is the signalling and communicating method known by both entrant and attendant?			
5	Is a SCBA required for entry, and is it readily available for use?			

5	Have the lids and vents of the tanker been kept open, and have all required valves been opened or closed as per the line diagram for the unloading operation?													
6	Is static discharge done by the person holding the discharge rod provided?													
7	Is a Spill Kit kept readily available to absorb the spillages if any?													
Lifting/Shifting heavy equipment/machinery/material		Yes	No	NA										
1	Are the lifting tools & tackles used found in good condition (no defects observed)?													
2	Are all valid and relevant documents like Driver and vehicle documents verified and checked?													
3	Is a signalman deployed to guide the crane operator and riggers while equipment is being shifted/moved through the crane?													
4	Ensure there are no obstacles on the route and that the overhead power lines/road/floor/surface are safe for moving with lifting equipment.													
5	Ensure the lift area is clear of machinery, piping, or live electrical lines, if not clear protection has been given.													
6	Are the lifting plans attached?													
Name of the persons involved

Additional comments if any (Specify):

Permit Issuance				
We have inspected the mentioned location and confirmed that all necessary precautions have been taken and verified to ensure that recommended safety measures are in place as per the JSA and PTW checklists. The location is safe for work, which will be conducted under the supervision of the permit initiator and the contractor.				
Name & Signature of Permit initiator/work in charge		Name & Signature of Contractor		Name & Signature of Permit Authoriser / Plant Head

Verification by HSE Personnel				
I have checked and verified all the safety precautions and found that the workplace is safe to work the necessary precautions and control measures are in working conditions and the work shall commence. The permit may be withdrawn if any deviations from Safety is noticed.				
Date:		Name of the HSE personnel:		
Time:		Signature:		
Permit Extension (from 6 PM to 10 PM) / Cancellation				
This permit to work has been Canceled for the reason stated below and all the signatories of this permit have been informed / Extended and the relevant authority has been informed.				
Reason:				
Time extended to :		Permit Authoriser	Name & sign of the HR In-charge (if required)	HSE personnel
Permit Closure				
The work has been completed as per the permit requirements. The area has been inspected, verified to be risk-free, and cleaned. All equipment has been removed, connections re-established, and the area is ready for normal operations. The work permit can now be closed.
